PROPERTIES

AMINOFERT improves growth, flowering and curdling, increases fruit development, improves maturation, stimulates the storage of reserve substances and helps to overcome moments of weakness such as those caused by intense cold or frost, drought, diseases and pests.

It is recommended, however, to follow the doses and applications established by their technicians at the field level, which will vary according to the type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribución del Levante Bioval, S.L." or through our agents or distributors we can advise you as to the use dose according to your culture.
