BIOVAL BORZIN ACTIVE

CORRECTOR BORON AND ZINC

FORMULATED IN SOLUBLE POWDER SP

SPECIAL OLIVE (COMPATIBLE)

CE FERTILIZER

DECLARED CONTENT

Boron (B) soluble in water	13,0% p/p
Zinc (Zn) soluble en water	5,0% p/p

PHYSICOCHEMICAL CHARACTERISTICS

Density: 1,10-1,15 gr/cc
pH: 6-7
Colour: Translucent brown

PROPERTIES

BIOVAL BORZIN ACTIVE is a foliar fertilizer that associates Boro and Zinc in balanced proportion in order to efficiently improve yield, prevent or correct eventual deficiencies of these elements. It is adapted in its formulation to crops especially sensitive to these deficiencies. Due to its high solubility, rapid absorption and acidifying effect on the spray broth (stabilizes the pH-buffering capacity), it is particularly recommended in cases of hard water and / or limescale. Its formulation is not aggressive and is applicable in the most sensitive periods of strong growth of the plant.

BIOVAL BORZIN ACTIVE is also compatible with other fertilizers or phytosanitary products, although it is recommended to carry out a preliminary test and to incorporate it after the powder formulations.

RECOMMENDED GENERAL DOSE:

FOLIAR: 2-3 kg / hectare (maximum concentration 1%) in pre-foliage, flowering and after harvesting.

It is recommended, however, to follow the doses and applications established by their technicians at the field level, which will vary according to the type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribución del Levante Bioval, S.L." or through our agents or distributors we can advise you as to the use dose according to your culture.

STORAGE:

Look for storage in a dry place, cool and without long exposure to the sun.
Keep in original container.
Away from food, drink and feed.
It is recommended to use it within 2 years of the lot date.
Precautions, risk phrases and safety: see label on packaging.
