DECLARED CONTENT

Calcium oxide (CaO) soluble in water	12,0% p/p
Free Amino Acids	4,19% p/p
Nitrogen (N) Total	0,68% p/p
Nitrogen (N) Organic	0,68% p/p
Organic material	4,60% p/p

BIOVAL CALCIUM + AA
CALCIUM OXIDE WITH FREE
AMINO ACIDS.
LIQUID

PHYSICOCHEMICAL CHARACTERISTICS

Density: 1,10-1,15 gr/cc

pH: 6-7

Colour: Translucent brown

PROPERTIES

Fertilizer of high efficiency and fast absorption based on free amino acids obtained by hydrolysis of proteins of animal origin and enriched with calcium. It is especially indicated when there is demand for this element in the crop.

BIOVAL CALCIUM + AA is recommended to prevent and correct calcium deficiencies that can affect crop growth and manifest in forms such as apical necrosis, bitter pit, cracking or premature maturity.

RECOMMENDED GENERAL DOSE:

FOLIAR: 200-300 cc / hl (1-2 applications in vegetative growth)

FERTIRRIGATION: 2-3L / hectare (1-2 applications in vegetative growth)

It is recommended, however, to follow the doses and applications established by their technicians at the field level, which will vary according to the type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribución del Levante Bioval, S.L." or through our agents or distributors we can advise you as to the use dose according to your culture.

STORAGE:

Product stable for 2 years from the date of manufacture.
Store in the original container.
Do not stack more than 3 heights.
Store in cool, dry places without prolonged exposure to the sun.
Keep stored in its original container, away from food, drink and animal feed.
It is recommended to use it before two years from the date of batch.
Precautions, risk phrases and safety: see label on packaging.
