## DIVERSE

**BIOVAL CORRECTOR pH**  
CORRECTOR OF THE HARDNESS  
AND WATER pH  
LIQUID  
GENERAL USE

### DECLARED CONTENT

Nitrogen (N) Total	4,0% p/p
Nitrogen (N) ureic	4,0% p/p
Surfactants	10,0% p/p
Octylphenol ethoxylat	15,0% p/p
Neutralizing Agents	10,0% p/p

### PHYSICOCHEMICAL CHARACTERISTICS

Density: 1,22 Kg/L  
pH: 2-3

### PROPERTIES

Hardness is defined by the concentration of bivalent cations present in water, mainly due to calcium, magnesium, zinc, iron and manganese ions, expressed in parts per million. BIOVAL CORRECTOR pH is responsible for neutralizing the salts that cause this hardness to facilitate the effectiveness of agrochemicals.

#### RECOMMENDED GENERAL DOSE:

Must be applied with an agrochemical.

#### INTERVAL AND FREQUENCY OF APPLICATION:

According to the agrochemical of the mixture up to optimal ranges. From "Levant Distribution Bioval S.L." or through our agents and distributors, we can advise you as to dosage of use with products of this catalog. However we recommend consulting with your technician on foot.

*It is recommended, however, to follow the doses and applications established by their technicians at field level, which will vary according to type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribution of the Levant Bioval, S.L." or through our agents or distributors we can advise you as to the dose of use according to your crop.*

#### STORAGE:

Keep in original container.  
Away from food, beverages and feed  
In a cool, dry place and without prolonged exposure to the sun.  
Do not stack more than 3 heights.  
It is recommended to use it before 2 years from the date of lot.  
Precautions, risk phrases and safety: see label in pack
