CORRECTORS

BIOVAL MOLBOX PK

BORO AND MOLYBDENE
CORRECTOR WITH
PHOSPHORUS AND POTASA

FORMULATED IN SOLUBLE POWDER

DECLARED CONTENT

Boron (B) soluble in water	7,5% m/m (75g/L)
Molybdenum (Mo) soluble in water	8,0% m/m (80g/L)
Phosphorus pentoxide (P₂O₅) soluble in water	15,0% m/m (150 g/L)
Potassium Oxide (K₂O) soluble in water	20,0% m/m (200 g/L)

PHYSICOCHEMICAL CHARACTERISTICS

Appearance: Soluble SP

pH: 5-6

Toxicity: non-toxic, non-flammable, non-corrosive, non-dangerous

PROPERTIES

Boron and Molybdenum compound corrective fertilizer with phosphorus and potash that promotes the formation of carbohydrates. It participates in the synthesis of sucrose and starch, in the activation of ATP and in the maintenance of phloem functionality.

BIOVAL MOLBOX PK promotes plant growth through cell division, rooting and tillering of crops. It takes part in the flowering, accelerating the ripening of the fruits and favoring its quality in vitamins, proteins and flavor. It also acts as a natural resistance against diseases, parasites and frost.

RECOMMENDED GENERAL DOSE:

Foliar: 200-300 grs / hl at a rate of 3kgs / hectarea.

Fertigation: 2.5-3.5 Kgs / hectare between 300-400 cc / hl.
(It is advisable to apply in pre-flowering and during fruit setting).

It is recommended, however, to follow the doses and applications established by their technicians at the field level that will vary according to type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribución del Levante Bioval, S.L." or through our agents or distributors we can advise you in terms of the use dose according to your crops.

STORAGE:

Keep in original container.
Do not store if mixed.
Do it in a dry place and protected from extreme temperatures and excess direct sunlight.
Keep away from food, drink and animal feeding stuffs.
Do not stack more than 4 heights.
Stable product. Use before 2 years of the lot date.
Precautions, risk phrases and safety: see label on packaging.
