#### RECOMMENDED GENERAL DOSE:

Foliar: At a rate of 150-300 cc / HI according to cultivation and need.

Fertigation (drip): At 150-300cc / HI according to culture and needs.

*It is recommended, however, to follow the doses and applications established by their technicians at field level, which will vary according to type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribution of the Levant Bioval, S.L." or through our agents or distributors we can advise you as to the dose of use according to your crop.*

#### STORAGE:

Keep in original container.  
 Away from food, beverages and feed  
 In a cool, dry place and without prolonged exposure to the sun.  
 Do not stack more than 3 heights.  
 It is recommended to use it before 2 years from the date of lot.  
 Precautions, risk phrases and safety: see label in pack
