### PROPERTIES

Biological insecticide for preventive and curative use, action by contact and broad spectrum, especially recommended for horticultural, strawberry, raspberry, ornamental and vinifera. Its active ingredient is pyrethrin, the sesame oil extract being responsible for increasing its efficiency. Its time of action is short, so multiple applications must be made. Combats whiteflies, aphids, thrips, ants and other insects.

#### RECOMMENDED GENERAL DOSE:

200-300 cc / HI (up to 3-4 applications every 5-7 days)

*It is recommended, however, to follow the doses and applications established by their technicians at field level, which will vary according to type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribution of the Levant Bioval, S.L." or through our agents or distributors we can advise you as to the dose of use according to your crop.*

#### STORAGE:
