### PHYSICOCHEMICAL CHARACTERISTICS

Density: 1,42 kg/L

pH: 7-8

### PROPERTIES

Concentrated suspended NPK fertilizer containing essential nutrients in percentage equilibrium and other high quality chelated secondary inputs (EDTA). Its formulation makes it versatile in both foliar application and fertigation. High efficiency complex thanks to its gel texture that allows a homogeneous and slow dispersion of nutrients to be absorbed by the plant as a whole.

BIOVAL DENSO EFFECT 20 can be used safely in all crops and especially citrus, fruit, vine, olive and extensive. It has zero residue, is free of impurities, chlorine, sodium or heavy metals and has no compaction of dusts or lumps.

#### RECOMMENDED GENERAL DOSE:

Foliar: 200-500 cc/hl (depending on culture)

Fertigation: 4-8 L/hectare (depending on crop)

*It is recommended, however, to follow the doses and applications established by their technicians at the field level, which will vary according to the type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribución del Levante Bioval, S.L." or through our agents or distributors we can advise you as to the use dose according to your culture.*
