NPK 4-8-16 + 2% MgO**

and other secondary elements

## DECLARED CONTENT

Nitrogen (N) Total	4,0% p/v
Nitrogen (N) Ureic	4,0% p/v
Phosphorus pentoxide (P <sub>2</sub> O <sub>5</sub> ) soluble in water	8,0% p/v
Potassium Oxide (K <sub>2</sub> O) soluble in water	16,0% p/v
Magnesium Oxide (MgO) soluble in water	2,0% p/v
Sulfur Trioxide (SO <sub>3</sub> ) soluble in water	4,0% p/v
Boron (B) soluble in water	0,01% p/v
Copper (Cu) soluble in water	0,002% p/v
Iron (Fe) soluble in water	0,02% p/v
Manganese (Mn) soluble in water	0,01% p/v
Molibdene (Mo) soluble in water	0,001% p/v
Zinc (Zn) soluble in water	0,006% p/v

## PROPERTIES

Concentrated suspended NPK fertilizer containing high quality essential and secondary nutrients. It is of polyvalent formulation and it is applied as much of foliar way as by fertirrigation for the nutritional improvement of the plant. It is suitable for crops suffering from stress conditions, such as drafts, fungal attacks, poor soil conditions, etc.

It is a highly versatile complex. Small amounts of product are sufficient for high efficiency. It is particularly suitable for the early stages of cultivation, although it can be applied in all phases of vegetative growth. **BIOVAL DENSOGEL 4-8-16 + 2% MgO** is 100% free of impurities, residues and compounds of chlorine, sodium and heavy metals, without compaction or formation of dusts or lumps. It reduces soil pH, which increases the availability of nutrients for plants. It is very high assimilation and can be used safely in all types of crops, especially fruit, vegetables, citrus, vine, olive and extensive crops.

### STORAGE:

Keep in original container.

Do not store if mixed.

In a dry place protected from extreme temperatures and excessive sun.

Keep away from food, drink and animal feeding stuffs.

Do not stack more than 4 heights.

Use before 2 years of the lot date.

Precautions, risk phrases and safety: see label on packaging.

### PRESENTATION:

## PHYSICOCHEMICAL CHARACTERISTICS

Density: 1,26 gr/cc

pH (disol. 10%): 6-7

Colour: white

### RECOMMENDED GENERAL DOSE:

FOLIAR: 200-500 cc/hl (depending on culture)

FERTIRRIGATION: 4-8 l/ha (depending on crop)

It is recommended, however, to follow the doses and applications established by their technicians at the field level, which will vary according to the type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribución del Levante Bioval, S.L." or through our agents or distributors we can advise you as to the use dose according to your culture.
