DECLARED CONTENT	
Nitrogen (N) Total	15,0% p/v
Nitrogen (N) Ammonia	0,90% p/v
Nitrogen (N) Nitric	12,1% p/v
Nitrogen (N) Ureic	2,0% p/v
Calcium oxide (CaO) soluble in water	22,50% p/v
Magnesium oxide (MgO) soluble in water	3,00% p/v
Boron (B) soluble in water	0,075% p/v
Copper (Cu) soluble in water	0,06% p/v
Iron (Fe) soluble in water	0,075% p/v
Manganese (Mn) soluble in water	0,15% p/v
Molybdenum (Mo) soluble in water	0,0015% p/v
Zinc (Zn) soluble in water	0,03% p/v

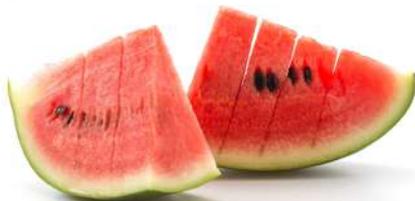

PHYSICOCHEMICAL CHARACTERISTICS

Formulated: Soluble liquid

Density: 1,50 gr/cc

pH (disol. 10%): 5,5-6

Colour: yellow

PROPERTIES

Corrector of deficiencies of calcium and magnesium that manages to optimize the absorption of the nutrients and a greater permanence of the product on the leaf, in a way that lengthens the period of effectiveness of the application.

Calcium is a sparingly mobile element inside the plant, so it is especially important to apply it via foliar. Not only is it an essential element for the proper development of plants (it plays an essential role in the formation of cell membranes), but it is also interesting in order to improve the storage capacity of the fruit after harvest.

RECOMMENDED GENERAL DOSE:

Foliar: 200-400 cc / hl (0.2% -0.4%)

Adjusted to the needs of plants.

It is recommended, however, to follow the doses and applications established by their technicians at the foot of the field, which will vary according to the type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribution of the Levant Bioval, S.L." or through our agents or distributors we can advise you as to the dose of use according to your crop.

STORAGE:

Stable product if not previously diluted.
Keep in original container
Look for storage in a dry place, cool and without long exposure to the sun.
Do not stack more than 3 heights.
Away from food, drink and feed.
It is recommended to use it within 2 years of the lot date.
Precautions, risk phrases and safety: see label on packaging.
