## DIVERSE

### DECLARED CONTENT

Calcium carbonate	60,0% p/p
Calcium silicate	10,0% p/p
Calcium (CaO)	34,0% p/p

### PHYSICOCHEMICAL CHARACTERISTICS

Specific Gravity: 1,43 gr/ml  
 pH (solution 1%): 7-8  
 Colour: White Milky  
 Odor: characteristic

### PROPERTIES

**BIOVAL PROTECT FLOW** is a fluid dispersion of micronized calcium carbonate and silicon fast drying and resistant to washing by regular rains. It is easy to remove postharvest and is designed to act as a protector against sunburn and heat stress in crops. It forms a film of particles based on minerals which, in turn, acts as a vegetative and protective enhancer against water stress and barrier against fungi such as mildew, powdery mildew or parasites and masticators. It improves the color of the fruit and prolongs its post-harvest life. Especially recommended in vineyard and olive groves (from fruit size 5mm), in citrus and fruit (apple, pear, persimmon ...) from 15-20 mm diameter of fruit to harvest and in vegetables (eggplant, pepper, tomato. ..) from flowering to harvest or from rooting of transplant to harvest.

#### RECOMMENDED GENERAL DOSE:

2% solution making the necessary applications to maintain crop protection until harvest.

**Note:** For the best surface coverage of the fruit, apply first thing in the morning or when the sun goes down, when the ambient temperature is lower.

#### WARNING:

Applicable to all non-calcium sensitive cultures.

*It is recommended, however, to follow the doses and applications established by their technicians at field level, which will vary according to type of crop, their extractions in fertilizer units and the phenological state of the same. From "Distribution of the Levant Bioval, S.L." or through our agents or distributors we can advise you as to the dose of use according to your crop.*

#### STORAGE:

Keep in original container.  
 Away from food, drink and feed.  
 In a cool, dry place and without prolonged exposure to the sun.  
 Do not stack more than 3 heights.  
 It is recommended to use it before 2 years from the date of lot.  
 Precautions, risk phrases and safety: see label on packaging.
